

### Price adjustments september 2022

The recent years have been strange, covid-19 crisis, semiconductor surge and unavailability of key components, increasing prices of almost everything because of Russias invasion of Ukraine.

2011 was the year our old price list was made, so now it's time for a new price list - here we go.

#### USB to RS485 converteres

*The original converter from 2011. USB bridge : FTDI chip FT230 or FT232.*

	Stock	2011-2022 price [EUR]		2022 - price [EUR]	
		@1	@10	@1	@10
USB485-STIXL		65	58	80	73
USB485-STI4W		70	63	85	78
USB485-ILP		70	63	85	78
USB485-CPT		75	68	90	83
USB485-MB45-150		74	67	89	82
USB485-MB45-300		79	72	94	87
USB485-MB45-500		85	78	100	93

The /22 is a new converter from 2022 with the cheaper CP2102 USB bridge chip from Silicon labs. The functionality is the same, but this CP2102 chip requires driver installation, while the FT230 / FT232 chip uses drivers already embedded in Windows, Linux and Mac systems.
